REMARQUE :

Le raccordement de la A87 (route de la Tzoumaz) sur la T9 est dépendant de la validation par le service de la mobilité de l'Etat du Valais du turbo-giratoire projeté.

The map illustrates the proposed road alignment for the A87 road, connecting to the T9 road. The alignment is highlighted in yellow and orange, showing its path through the landscape. Key locations labeled include Riddes, Les Sauges, Les Morands, Les Motteys, and Longes Rayaz. The map includes property boundaries, existing buildings, and topographic features. A north arrow is present in the upper right quadrant. Engineering details such as curve radii (R=1500, R=1000) and stationing (e.g., 10005, 10006) are indicated along the alignment. A legend box in the lower right corner specifies the road category and width: 'Route communale A87 RIDDES - LA TZOUMAZ', 'Berge: 0.75 m', 'Chaussée: 0.40 m', 'Berge: 0.75 m'. Directional labels like 'à Riddes', 'à Les Motteys', 'à Longes Rayaz', and 'à La Tzoumaz' are placed along the route. The map also shows existing infrastructure like the T9 road and various local roads.
